

# Moving Supply Checklist

The only way to be certain that your household goods will survive a move is to pack them properly with the right supplies.

## Smaller boxes make heavy items more manageable -

- **Small Moving Boxes** – Small boxes are ideal for heavy or fragile items that must be packed on their own to ensure ease of handling.
- **Medium Moving Boxes** – Medium boxes tend to be among the most-used moving boxes. They are ideal for small appliances and other household items. These boxes are often most compatible with dish pack and glass pack inserts used to keep fragile glassware insulated.
- **Large Moving Boxes** – Large boxes are ideal for mixed lightweight and medium weight goods like lampshades, framed art, throw pillows and clothing.
- **X-Large Moving Boxes** – X-Large boxes are ideal for bulky light weight soft goods like comforters, blankets, clothing, and pillows.
- **Heavy Duty Boxes** – Heavy Duty boxes are reinforced with thicker walls for heavier applications. These are ideal for packing and protecting electronics, book collections, and appliances.

## Specialty boxes help secure fragile items -

- **Wardrobe Boxes** – A wardrobe box is constructed with a hanger bar so that you can transfer shirts, blouses and suits directly from the closet into the box without folding or wrinkling your clothes. These boxes come in several heights to additionally accommodate for longer items such as dresses and pants.
- **Electronics Boxes** – Electronics boxes are specially sized to safely transport home entertainment consoles such as DVD players, stereo amplifiers and gaming systems.
- **Dish Pack Kit** – Dish pack kits are compartmentalized to accommodate dinner plates, side plates, saucers and bowls. Many kits include foam padding to enclose and isolate each piece to ensure safe transit.
- **Glass Pack Kit** – Glass pack kits are compartmentalized to accommodate glassware, crystal and stemware. Many kits include foam padding to enclose and isolate each piece to ensure safe transit.

# Moving Supply Checklist

The only way to be certain that your household goods will survive a move is to pack them properly with the right supplies.

## Moving can be more efficient with the right tools -

- **Unprinted News Wrap** – Unprinted news wrap is an ideal and inexpensive way to protect fragile items during a move. Unprinted paper stock provides the added advantage of a clean, ink-free move.
- **Bubble Wrap** – A large roll of bubble wrap goes a long way on moving day. Bubble wrap can be used to enclose fragile items and to insulate voids along the sides of boxes to ensure your items make it safely to their destination.
- **Permanent Box Markers** – Permanent markers are absolutely necessary to communicate with your moving crew. Mark boxes with inventory, warning and special instructions to make sure every parcel receives appropriate care – even when you aren't there to direct traffic.
- **Box Tape Dispenser** – When taping a large number of boxes, you'll want a proper dispenser to speed progress. A tape gun will lay down straight seams and help you keep your fingers clear of a sticky mess when cutting.
- **Box Tape Refills** – High quality box tape will ensure that your belongings stay in place during transit. Make sure you have plenty of it on-hand when packing the house.
- **Box Cutter** – You'll come to appreciate a sharp box cutter when it comes time to unload. Make sure you have plenty of refill blades on-hand too – tape, adhesive and cardboard can dull your knife faster than you think.
